Posture Care

Many people are suffering from back pain and so are advised by medical practitioners to keep the body in straight natural alignment whilst seated... VENUS already Back-up a solution such as rigid mesh back support that the body needs to alleviate pressure on the spinal cord and lower back allowing sufferers of back pain to sit comfortably.

Dimensions and Ergonomics

Our ergonomic direction is employed to fulfill the two goals of health and productivity. It is relevant in the design of such things as safe furniture and easy-to-use interfaces to machines and equipment. Proper ergonomic design is necessary to prevent repetitive strain injuries, which can develop over time and can lead to long-term disability.

Ergonomics is commonly thought of as the way companies customize procedures, work areas and break rooms to maximize productivity while minimizing worker fatigue and discomfort. We now that keeping your personnel energized and comfortable is important for lowering stress and maintaining job satisfaction.

The Design focused on Achieving Both Ergonomics & Functionality
